

Eventuri 3D prints custom intake solutions for top tier super cars

Eventuri, based in the UK, is specialised in designing custom intake solutions for sport cars. They are using an Extreme 1000 and 1500 PRO. The 3D printed intake systems allow them to do a fitting test and also use them for testing to see if the performance of the car improves.

Size of intake system: 80 cm
3D printed parts: 2 red pieces glued
Nozzle size: 0.4 mm (high quality)
Print time: 55 hours
