HOW TO ADD ADDITIONAL LICENSE TO YOUR STANDALONE INSTALLATION

The following details the procedure to add additional product licenses to your SOLIDWORKS installation. By following this guide, you can add all purchased products to your local installation.
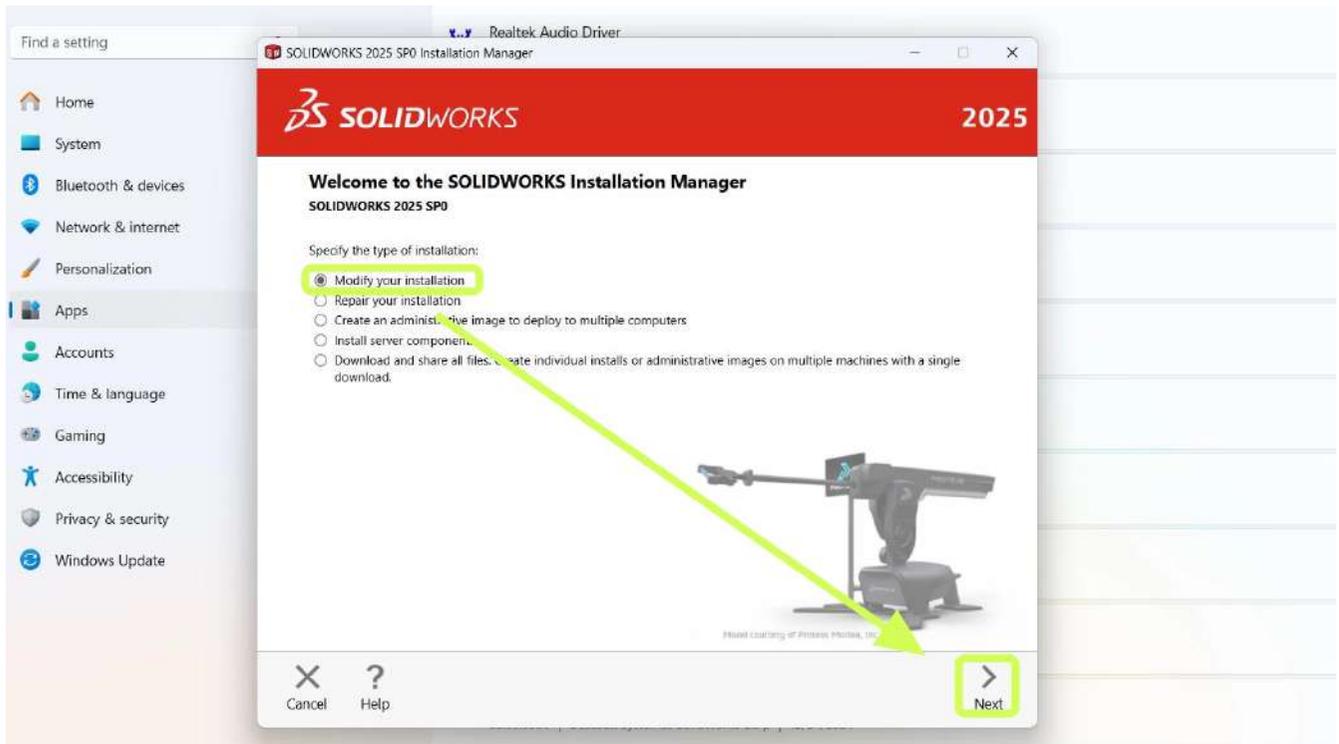

1. Select the **Windows Search Bar**, then begin typing «Add or remove programs». Open Add or remove programs.

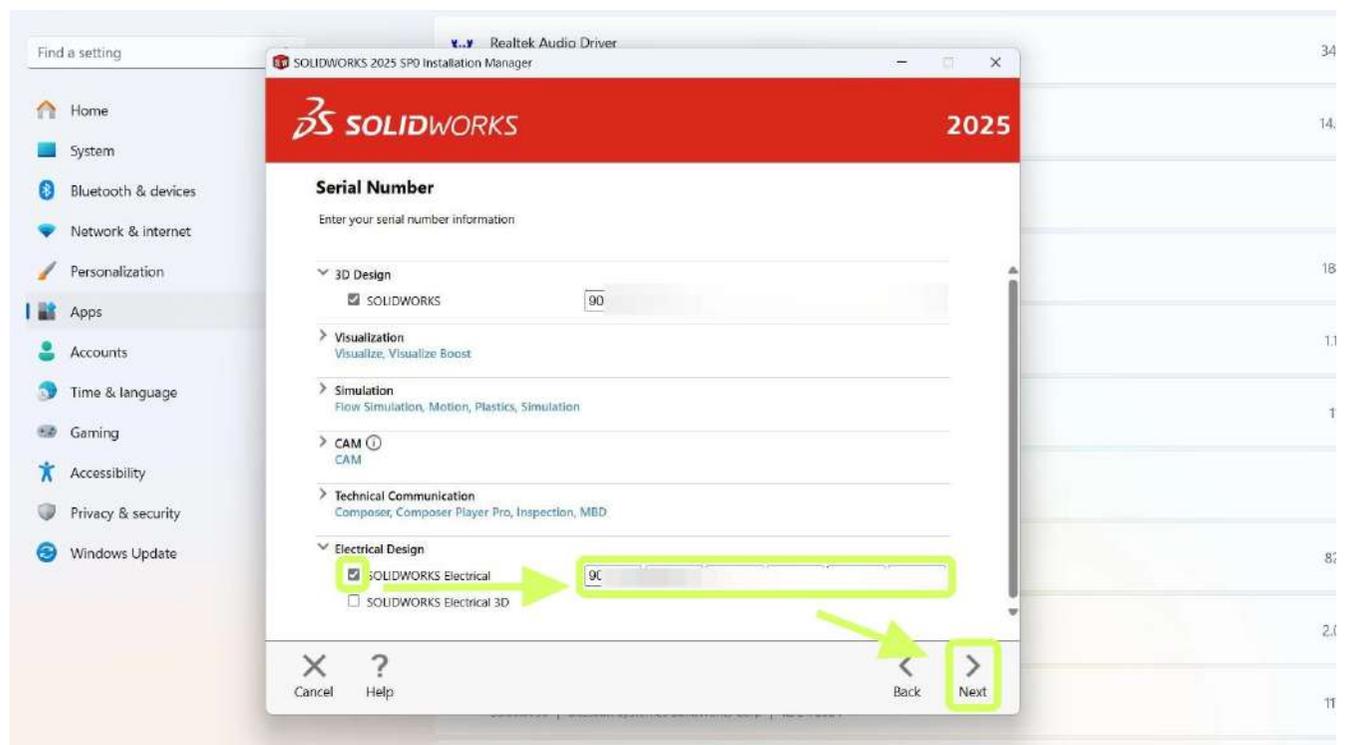

2. Scroll down to your SOLIDWORKS installation (e.g. SOLIDWORKS 2025 SP0), then select the **Ellipsis**, then select **Modify**.

5. Check to select each of the **desired products**, then select **Next**.

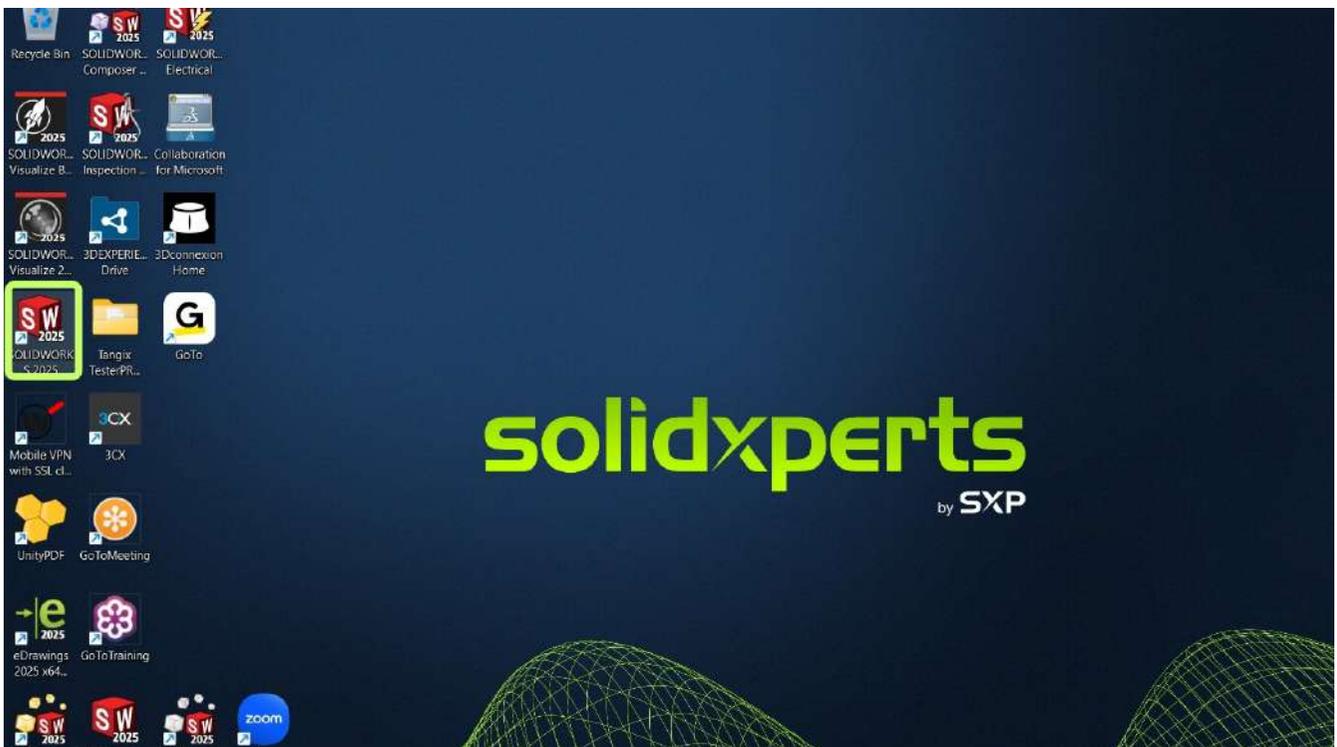

**6.** Check the box to **Accept the terms**, then select **Modify Now**.

solidxperts

7. Uncheck the box **Show What's New** (if a refresher on the contents of the update is undesired), select **No, thank you** (if being enrolled in the experience improvement program is undesired), then select **Finish**.

8. Open **SOLIDWORKS** (e.g. SOLIDWORKS 2025).

9. Select the **Options Flyout Menu**, then select **Add-Ins**...

10. In the **«Add Ins» menu**, you will find a majority of SOLIDWORKS products available to activate. This includes all versions of SOLIDWORKS Simulation, Routing and 3D Electrical Products, and many more. Some products like SOLIDWORKS Visualization have separate applications, with icons on your home screen.
